

General Questions About Your Courses

1. **Q: What topics do your courses cover?**

A: My courses focus on AI, automation (Zapier & Notion), and business efficiency. They include hands-on projects and real-world use cases.

2. **Q: Are your courses beginner-friendly?**

A: Yes! My courses start from the basics and gradually move to advanced topics, making them suitable for all skill levels.

3. **Q: Do I need technical skills to take your courses?**

A: Not at all! My courses are designed for non-coders, with clear step-by-step instructions to help you build powerful AI and automation workflows.

4. **Q: Do you offer certificates of completion?**

A: Yes, if you complete a course on Udemy or another learning platform, you will receive a certificate of completion.

5. **Q: What if I have questions while taking the course?**

A: You can ask in the course Q&A section, my Facebook group, or my Skool community. I or other members will help you out.

Purchasing & Access

6. **Q: How can I buy your courses?**

A: You can purchase them on Udemy or through my website. I'll provide links for easy access.

7. **Q: Do I get lifetime access to the courses?**

A: Yes, when you purchase a course, you get lifetime access, including future updates.

8. **Q: Can I access the course from any device?**

A: Yes, all courses are available on desktop, tablet, and mobile through the learning platform.

9. **Q: Do you offer refunds?**

A: Udemy offers a 30-day refund policy, so if you're unsatisfied, you can request a refund.

AI & Automation-Related Questions

10. **Q: How can I automate my business using AI?**

A: My courses teach you how to use AI and Zapier to automate emails, social media, customer follow-ups, and much more.

11. **Q: Can I use AI automation if I don't know how to code?**

A: Absolutely! My automations require no coding—just drag-and-drop tools and easy integrations.

12. **Q: Do you teach how to use Notion for business workflows?**

A: Yes! I show how to use Notion to organize projects, manage tasks, and create automated workflows.
